Labour Force Statistics ◆ December 2006

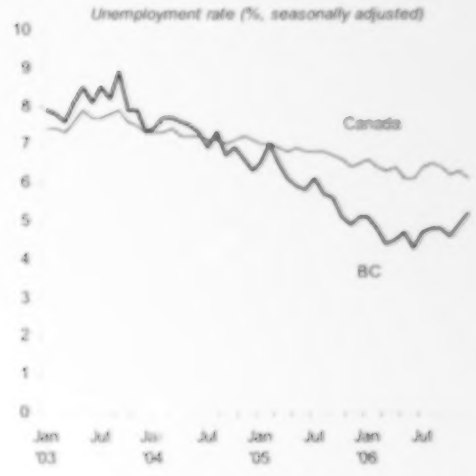
HIGHLIGHTS

All labour force statistics are seasonally adjusted, unless otherwise indicated

Unemployment rate up to 5.2% in December

British Columbia's unemployment rate inched up to 5.2% in December, as a 0.4% increase in the number of jobs (or +9,900) was offset by a 0.8% jump (or +18,400) in the number of people who were either working or looking for work. The participation rate remained stable in the last month of 2006, with 66.2% of the working age population (15 and older) in the labour force. Residents of the province, as in the rest of western Canada, continued to enjoy one of the best job markets in the country. Despite December's increase, BC's unemployment rate was well below the national average (6.1%) and lower than in any other province except Alberta (3.3%), Saskatchewan (4.0%) and Manitoba (4.1%).

BC's unemployment rate remains well below the national average



Gains in goods sector higher than in goods industries

Employment in the goods sector stepped up 1.0% with the number of jobs increasing in three major industries. Construction (+2.5%) and manufacturing (+2.0%), the biggest employers in the goods sector (accounting for eight out of every ten jobs), had more workers on their payrolls in December, while the number of jobs in agriculture (+1.1%) also continued to expand. At the same time, employment was down in utilities (-5.1%) and other primary industries (forestry, fishing & mining), which took on 7.5% fewer workers.

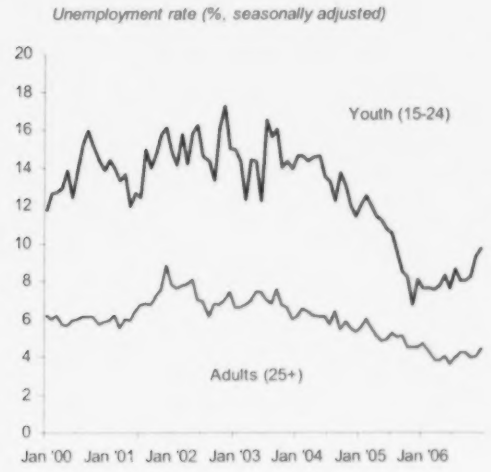
The service sector, which employs eight out of every ten workers in the province, recorded a more moderate increase in employment (+0.3%) as job growth in some industries was offset by declines in others. Employment in public administration slipped 4.8% and overall employment growth was also tempered by cutbacks in wholesale & retail trade (-1.6%) and accommodation, food & beverage service (-1.4%). However, education (+1.8%) and health & social services (+4.4%) took on significantly more workers.

Youth unemployment reaches highest level in over a year

Young people looking for work continued to face more difficulties than in the other months of 2006. The unemployment rate for young people (aged 18-24) climbed to 9.7% in December, the highest rate since July of 2005. The unemployment rate for young people in the province is nearly double the rate for adults aged 25 and over (4.4%) who are seeking work.

Despite the recent upsurge, the youth unemployment rate remained well below historic levels.

Unemployment rate for young people remains lower than in previous years



More men (+0.5%) and more women (+0.5%) had jobs in December. Employment inched down in the private sector (-0.2%), but was up in the public sector (+0.4%). At the same time, the ranks of self-employed British Columbians increased (+2.6%), recovering from a 1.6% slip in November. Full-time employment was up 1.2%, while the number of people with part-time jobs slipped (-2.4%).

Jobless rate lowest in Mainland/Southwest, highest in Kootenay

Among the regions, Mainland/Southwest (*4.1% 3-month moving average*) replaced Thompson-Okanagan (up .01 percentage points to 4.2%) as having the lowest jobless rate in the province. The Kootenay region recorded the highest incidence of unemployment in December followed by North Coast & Nechako (6.2%). Cariboo's unemployment rate was also slightly higher compared to other regions. Vancouver Island/Coast recorded a moderate rate of 4.9% with Victoria continuing to benefit from one of the lowest unemployment rates in the province, while Nanaimo (7.0%) and other parts of the region were not faring as well.

Vancouver's unemployment rate unchanged, but Victoria sees continued improvement

Vancouver's unemployment remained unchanged at 4.0% (*3-month moving average*) in December. Abbotsford's unemployment rate increased, going from 3.7% in November to 4.1% last month. In Victoria, the job market remained robust, and the unemployment rate continued to improve. It was 3.4% in December, the lowest rate observed in 2006.

The National Scene

The Canadian unemployment rate was 6.1% in December, down 0.2 percentage points from November. Jobless rates were lower in the provinces west of Quebec, ranging from 3.3% in Alberta to 6.1% in Ontario. On the other side of the country, Newfoundland (13.8%) and Prince Edward Island (12.4%) had the highest unemployment rates.

Selected Statistics	Dec-06	Nov-06	Dec-05
BC Unemployment Rate (%)	5.2	4.9	5.1
Canadian Unemployment Rate (%)	6.1	6.3	6.5
BC Employment ('000)	2,218	2,209	2,167
BC Labour Force Participation Rate (%)	66.2	65.7	65.6
December % change in employment relative to:	-	0.4	2.4
December % change in labour force relative to:	-	0.8	2.5

NOTE: On January 25th, 2006, Statistics Canada released revised *Labour Force Survey* estimates for January 1987 through December 2005.

NOTES: 1. Occupation specific Unemployment Rates include only those unemployed who worked in the past year. The "All Occupations" rate incorporates total unemployed persons which includes an "Occupation Unclassified" category.

2. Due to the relatively small sample sizes from which disaggregated data are derived, caution should be used in the interpretation of month-to-month changes in the estimates.

Labour Force Statistics

This report is based on statistics from the Labour Force Survey produced monthly by Statistics Canada. Questions and comments should be directed to Data Services at (250)387-0327 or write to BC.Stats@gov.bc.ca.

Definitions and Explanatory Notes

Reference Week

Monthly estimates of employment, unemployment, and persons not in the labour force refer to the specific week covered by the survey each month, normally the week containing the 15th day.

Labour Force

The labour force is composed of those members of the civilian non-institutional population 15 years of age and over who, during the reference week, were employed or unemployed.

Employed

Employed persons are those who, during the reference week, either: (a) did any work at all, or (b) had a job but were not at work due to own illness or disability, personal or family responsibilities, bad weather, labour dispute, vacation, or other reason not specified above (excluding persons whose job attachment was to a job to start at a definite date in the future).

Unempioyment

Unemployed persons are those who, during the reference week, either: (a) were without work, had actively looked for work in the past four weeks (ending with the reference week), and were available for work; or (b) had not actively looked for work in the past four weeks but had been on layoff and were available for work; or (c) had not actively looked for work in the past four weeks but had a new job to start in four weeks or less from the reference week, and were available for work.

Unemployment Rate

The unemployment rate represents the number of unemployed persons expressed as a per-centage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number of unemployed in that group expressed as a percentage of the labour force for that group.

Participation Rate

The participation rate represents the labour force expressed as a percentage of the population 15 years of age and over. The participation rate for a particular group (age, sex, marital status, etc.) is the labour force for that group expressed as a percentage of the population for that group.

Employment Rate

The employment rate(employment/population ratio) is the number of employed persons expressed as a percentage of the population 15 years of age and over. The employment rate for a particular group (age, sex, marital status, etc.) is the employment for that group expressed as a percentage of the population for that group.

Rounding

Estimates published by the Labour Force Survey are rounded to the nearest thousand but all derived values (totals, averages, rates, ratios, percent changes, etc.) are calculated from unrounded figures. Therefore, the sum of the individual rounded items may not equal the total. Unadjusted estimates rounded to hundreds are available from BC STATS on request.

Seasonal Adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, holidays, vacation periods, and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations.
